

THE FIRST DAY

**HOW A SISSY WILL SPEND
HIS FIRST 24 HOURS**

*A Sponsor's guide to
Sissy Orientation*

PUBLISHED BY THE MELANDREN CORPORATION

A LETTER FROM THE CEO

Congratulations!

By sponsoring a useless male into the Melandren Corporation Sissy Training Program, you have started an exciting journey. Whether you plan to have your new Sissy returned to you in the future, or have enlisted him in our work/study program, your decision to allow him to fulfill his full Sissy potential is admirable.

Many Sponsors find themselves concerned about what will happen with their new Sissy as they are assimilated into the Melandren Program. Please remember that your Sissylink software allow you access to our security camera systems and you may monitor his new life as often (or as little) as you choose. We highly encourage you to watch as he discovers his new lot in life. These key moments are all recorded and our Production team guarantees a highlight best-of reel that will be available on your account.

The following pages will walk you through what your Sissy will experience in his first twenty-four hours of our program. While every Sissy is a unique snowflake, our process ensures they will become the bimbo they were always meant to be.

M. Daniels

CEO, Melandren Corporation

THE CONTRACT

Before we ever accept an incoming acquisition into the Melandren Corporation Training Program, they must first sign the standard contract. This is a very thorough and comprehensive document that easily allows you the Sponsor to control access to the acquisition's finances, power-of-attorney and legal guardianship. While this could be contested, it almost never comes about due to the acquisition being unable to leave our facility. As such, most courts simply accept the document, especially the courts with whom our corporation have an established relationship.

Most new acquisitions do not fully read the contract. This is often due to their own submissive nature as well as the very capable distraction provided by newly trained Melandren Sissies who provide customer service in our front office.

TIFFY & NICK

24 Hours away from being Nicole

For more information about the SissyLink Chastity system and the use of it in our training program, please see the Sissylink Manual.

Ask your Melandren Representative for more information.

SISSY-LINK CHASTITY

Within the hour of signing the contract, the newly acquired Sissy will be fitted with their own custom SissyLink Chastity Device. This Device is the cornerstone of the Melandren Training Program. With perpetual edging stimulation, this device begins to immediately condition the new Sissy to their role of aroused submission. This device is state of the art and allows every trainer, manager and even you, the Sponsor, to control the Sissy with a mere push of a button.

Video footage of the Sissy's face as they first experience the stimulation this Device provides is archived in your on-line account for your repeated viewing pleasure.

STATE OF THE ART

An unescapable chastity device that electronically stimulates the wearer without ever providing release.

FEMINIZATION

THE LETTER

CHRIS - SOON TO BE TRIXIE

The first time a Sissy is sent to the Beautification Center, they are often resistant and reluctant. Security is on hand to alleviate any problems.

All new Sissies are sent for immediate feminization. The following is standard practice for all new Sissies in our proprietary Beautification Center.

(See our Beautification Manual for more details.)

THE MELANDREN FIRST DAY FEMINIZATION PROCESS

Full Body Hair Removal

Scrub Down and Softening of Skin

Hair Extensions Installed

First Injections for Lips, Breasts and Backside

Full Manicure & Pedicure

Breast Forms Installed

Comprehensive Beauty Makeover

With a new feminine look, the now extremely horny and reluctant Sissy is asked to write a letter. This letter can be anything they want, but they are told it will be sent to you, their Sponsor. Oftentimes these letters are filled with anger, rage, denial and threats. It is kept in their permanent record to compare and contrast with the letters they are told to send to you at the end of each week. Some Sponsors grow concerned when reading these letters, but most people view them with a sense of enjoyment and delight. After all, the new Sissy is now helpless, trapped and ready for her training.

JENNI

Writing her first note to her ex-girlfriend and her new companion.

UNIFORMS

All new Sissies are fitted for three preliminary uniforms: School Girl, Office Girl and French Maid

More advanced uniforms are earned through good (or bad) behavior.

In addition to their required uniforms, all Sissies are measured and fitted for their first two weeks of sleepwear. All Sissies are required to wear lingerie each evening and part of the training program insist that their sleepwear be revealing, extremely sexual and constantly changing. As such, fourteen different slutty outfits are custom created for your new Sissy. They are made to try each one on during their first day to ensure the fit but to also give them an inherent dread of what they will have to endure in the weeks to come.

LINGERIE

NICOLE

What a difference one day makes...

By late afternoon, the new Sissy will be feminized and installed in the Program. In an effort to fully cement her new situation in her head, she will be dressed in her School Uniform and sent to an afternoon Etiquette class to begin her curtsy lessons.

It is tradition for all new Sissy students to introduce themselves to the class. Virtually all new Sissies fail to curtsy properly during this introduction and are then punished in front of the class.

Being spanked, bare-assed and crying in front of a room of their new peers is the first 'breaking point' of most new Sissies. As with all of these moments, this will be archived and available for repeated viewing in your Sponsor Online Account.

THE TRAINING BEGINS

THE FIRST NIGHT

Sissies are randomly assigned a different roommate every night. They are required to share a small bed after a mandatory kissing session. *(For more about the Melandren Sleeping Quarters additional information is provided.)* The first night is the end of a VERY long day for the new Sissy. In an effort to further stimulate and dominate this new helpless creature, their SissyLink Chastity Belts are programmed to stimulate them even more frequently, preventing any possible chance of sleep. Having her new feminine body pressed against another equally slutty companion while being edged over and over has proven time and again to push even the most resistant Sissy to tears.
